If you can relate to 5-10 things on this list, I think we will Jive well together and I would love to see what we could build together

2

If there are immediate turn offs to you, don't be scared, opposites can attract! But be aware of the things that are workable & the things that are innate.

The best way to get to know someone is reach out and chat. Fortunately for you, you can totally creep my social media and get a GREAT feel for who I am before you decide if working together is for you or not. On Instagram @coachjace FB.COM/coachjace

Of course a list of commonality is great to SEE but until you actually talk to someone, connect with their voice, see their eyeballs and feel their spirit, it can be hard to make a connection. I want to jive with those I work with because they become my family. That camaraderie is key in building a thriving business where people help people so feel free to reach out! Let's chat!
